PROFILE

Motivated Technologies student with hands-on experience in system administration, network security, and cloud computing. Proven ability to configure and manage security tools, build and maintain IT infrastructure, and enhance system reliability. Certified AWS Cloud Practitioner and CompTIA Security+ with a track record of successful projects, including Nessus and Pi-Hole integration, log monitoring systems, and NAS server setup. Eager to leverage a broad skill set in technology to contribute to impactful projects and advance in the field.

PROJECTS

[GitHub](#)

Nessus and Pi-Hole Integration on Raspberry Pi

- **Description:** Integrated Nessus for vulnerability scanning and Pi-hole for ad blocking on a Raspberry Pi.
- **Skills:** Linux, network security, Nessus, Pi-hole.
- **Results:** Enhanced network security and privacy by detecting vulnerabilities and blocking ads.

Basic Log Monitoring and Alerting System

- **Description:** Created a system for monitoring logs and sending alerts on critical events.
- **Skills:** Log management, alerting systems, troubleshooting.
- **Results:** Improved system reliability by early detection of issues.

Raspberry Pi NAS

- **Description:** Configured a NAS server on a Raspberry Pi for centralized storage.
- **Skills:** NAS setup, Raspberry Pi, network file sharing.
- **Results:** Enabled efficient file sharing and storage management.

WORK EXPERIENCE

System Intern

April 2024 - Present

Municipal Technologies (City of Weston)

- Successfully deployed 20 new desktops and 10 laptops, contributing to the city's seamless infrastructure management of 140+ devices, resulting in enhanced operational efficiency.
- Helped implement secure configurations by applying security patches and updates to reduce system vulnerabilities.
- Provided technical support to end-users, troubleshooting hardware, software, and network issues to ensure timely resolutions.
- Supported the IT team in maintaining security measures such as software updates and access controls to safeguard city systems and data.
- Contributed to regular system performance assessments to proactively detect potential risks and optimize operation.

Assistant Manager

August 2016- December 2023

REEF Technology | Miami, FL

- Organize and file paperwork regarding guests' vehicles and daily transactions.
- Establish and maintain departmental rules and procedures for all Bell and door and Valet Parking staff.
- Assist Risk Management in investigating accidents and handling guest problems up to but not including those that require involvement of Risk Management or senior management.
