PROFILE

Motivated Technologies student with hands-on experience in system administration, network security, and cloud computing. Proven ability to configure and manage security tools, build and maintain IT infrastructure, and enhance system reliability. Certified AWS Cloud Practitioner and CompTIA Security+ with a track record of successful projects, including Nessus and Pi-Hole integration, log monitoring systems, and NAS server setup. Eager to leverage a broad skill set in technology to contribute to impactful projects and advance in the field.

PROJECTS

GitHub

Nessus and Pi-Hole Integration on Raspberry Pi

- **Description:** Integrated Nessus for vulnerability scanning and Pi-hole for ad blocking on a Raspberry Pi.
- **Skills:** Linux, network security, Nessus, Pi-hole.
- **Results:** Enhanced network security and privacy by detecting vulnerabilities and blocking ads.

Basic Log Monitoring and Alerting System

- **Description:** Created a system for monitoring logs and sending alerts on critical events.
- **Skills:** Log management, alerting systems, troubleshooting.
- **Results:** Improved system reliability by early detection of issues.

Raspberry Pi NAS

- **Description:** Configured a NAS server on a Raspberry Pi for centralized storage.
- **Skills:** NAS setup, Raspberry Pi, network file sharing.
- **Results:** Enabled efficient file sharing and storage management.

WORK EXPERIENCE

Valet Assistant Manager

2016-2023

REEF Technology | Miami ,FL

- Organize and file paperwork regarding guests' vehicles and daily transactions.
- Establish and maintain departmental rules and procedures for all Bell and door and Valet Parking staff.
- Assist Risk Management in investigating accidents and handling guest problems up to but not including those that require involvement of Risk Management or senior management.

System Intern

2024 - Present

Municipal Technologies (City of Weston)

- Assisted in deploying 20 new desktops and 10 laptops as part of the city's Infrastructure, which includes 140+ devices and VDI systems.
- Provided technical support to end-users, resolving hardware, software, and network issues in a timely manner.
- Implemented security measures, such as software updates and access controls, to protect city systems and data.
- Collaborated on IT projects, including the installation and configuration of Windows Server 2022, and supported network expansion efforts.
- Conducted regular system checks and performance assessments to ensure optimal operation and resolve potential issues proactively.
- Contributed to managing a \$20,000 project, focusing on maintaining budget efficiency while ensuring timely delivery.
